

Distribution & Logistics

Stellar's Distribution & Logistics experts provide design, engineering and construction services for public refrigerated warehouses and retail, wholesale and food service distribution facilities. To meet the varied needs of its clients, Stellar offers a flexible approach, whether it's design-build, an engineering study or a construction management assignment. In addition to new facility construction, Stellar also provides services for expansions and renovations.

Stellar has the ability to self-perform work such as industrial refrigeration systems and equipment, thermal wall and roofing systems, controls and instrumentation, racking, material handling systems, conveyors, packaging and blast chillers.

Services

- Feasibility studies, budget estimation and planning
- Architecture and engineering
- Master planning and programming
- Supply chain management and productivity analyses
- Logistics modeling
- Industrial engineering, material handling
- Automation, packaging and ergonomic studies
- Industrial refrigeration and energy management
- Construction management
- Mechanical operations and maintenance

Industries Served

- Foodservice distribution
- Retail
- Wholesale
- Public refrigerated warehouses
